PROGRAM DESCRIPTION:

Models.py

```
from django.db import models

class emp(models.Model):
    name=models.CharField(default=0,max_length=50)
    dept=models.CharField(default=0,max_length=50)
    age=models.IntegerField(default=0)
    idno=models.IntegerField(default=0)
    qualification=models.CharFieldZZ(default=0,max_length=100)
    photo = models.ImageField(upload_to='static', default=0)
```

Admin.py:

```
from django.contrib import admin
from emp.models import details

# Register your models here.
class empadmin(admin.ModelAdmin):
    list=['name','dept','age','idno','qualification','photo']

admin.site.register(details,empadmin)
```

Urls.py:

```
from django.contrib import admin
from django.urls import path
from emp import views

urlpatterns = [
    path('admin/', admin.site.urls),
    path('',views.visible),
    path('home',views.visible),
    path('add/',views.add),
    path('edit/<id>', views.edit),
```

REDMI 12 5G

```
    path('delete/<id>', views.delete),
]
```

views.py:

```
from django.shortcuts import render,redirect
from emp.models import details

# Create your views here.
def visible(request):
    g=details.objects.all()
    return render(request,'visible.html',{'d':g})
```
